

Renamed southern energy storage

What is southern power-tranquility battery energy storage system?

The Southern Power-Tranquility Battery Energy Storage System is a 72,000kW energy storage project located in Tranquility, Fresno County, California, US. The rated storage capacity of the project is 288,000kWh. The market for battery energy storage is estimated to grow to \$10.84bn in 2026.

Are solar and storage projects a good idea for Southern Power?

“These co-located solar and storage projects are a first of their kind for Southern Power,” said Southern Power President Bill Grantham. “We expect these new battery-based energy storage projects to enhance California's grid reliability.

Where is Recurrent Energy headquartered?

Recurrent Energy is headquartered in San Francisco, California, the US. All publicly-announced energy storage projects included in this analysis are drawn from GlobalData's Power IC.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.
