

Rooftop solar battery cost breakdown in New Zealand 2030

How much does solar energy cost in New Zealand?

Costs also vary by region. Rooftop solar is the cheapest form of delivered energy available to New Zealand homes, at less than half of the average grid electricity costs. Households can enjoy cheap and clean energy, and use this to power their efficient electric appliances and cars.

Is rooftop solar the cheapest form of energy in New Zealand?

Solar is the cheapest form of energy available to New Zealand households, and the cheapest energy the world has ever created. The day you start powering your home's energy needs from your rooftop solar is the day you will save money on your energy bills.

How many rooftop solar panels are there in New Zealand?

There is about 200 MW of rooftop solar on residential buildings across New Zealand. The rest is commercial and industrial solar installations, where the business uses some or all of the solar generation on site. Any leftover generation is fed into the distribution network for other businesses and households to use.

Are solar batteries worth it in New Zealand?

Solar batteries are generally classified as a 'solar accessory', meaning they are an optional component of any system. And yet, in New Zealand, they nearly cross the line between 'optional' and 'essential'. Let us discuss what makes solar batteries important, and if they are worth the added system cost. **Why Do You Need Solar Batteries?**

How many solar installations are there in New Zealand in 2022?

In 2022, New Zealand had a record amount of distributed solar generation installed (68 MW). In the first few months of 2023, the rate of installation growth slowed somewhat.¹ However, distributed solar installations are expected to increase, with Transpower forecasting 535 MW by 2030.

Is solar power a good investment in New Zealand?

The investment is worthwhile for New Zealanders living in areas where power is costly or for those who wish to live off-grid solar and enjoy energy independence and the safety it affords. Calculating the payback period depends on how much your solar power system generates or "generated power" against current electricity prices.
