

Rooftop solar battery cost vs benefit calculation in Serbia

Is solar energy a good investment in Serbia?

The independent Belgrade-based Environment Improvement Center estimates that the potential of solar energy in Serbia is 30% higher than in Central Europe. In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest EUR5,000-6,000 in solar power systems.

Who are the 'prosumers' of solar energy in Serbia?

Her four-person household is one of the first 'prosumers' of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid.

What is a 'prosumer' of solar photovoltaic (PV) energy?

These solar panels contain solar cells that generate electric power. Her four-person household is one of the first 'prosumers' of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels.

Solsavi is a rooftop solar calculator tool. It utilises the latest state-specific solar policies and solar metering mechanisms to propose a rooftop solar system with or without battery energy storage, according to the user's priority. The tool also ...
