

Ryobi 40v battery charger solid red light

Does a Ryobi charger have an orange light?

However, most Ryobi chargers use red and green LEDs. They don't have an orange light. More than likely, you have confused the red light for an orange glow. With many Ryobi chargers, the yellow light flashes when the battery is charging. It becomes solid and stable when the battery is fully charged.

How do I know if my Ryobi battery is charging?

When you plug in the battery charger without a battery pack, you should see a solid RED light. This simply indicates that the charger is receiving power and is ready to charge a Ryobi battery. Once you put a battery pack on the charger, you should normally see one of two things:

Why is my Ryobi Charger flashing red and green?

If the Ryobi charger has flashing RED and GREEN lights, then there's definitely a fault that has to be dealt with. This could be happening for various reasons, such as a defective charger, a dead battery, or even something as simple as the contacts on the battery being dirty and not making good contact.

Why does Ryobi flash red light?

As this guide will soon show, some flashing LEDs are innocuous. Ryobi flashes red light because the battery is either too hot or too cold. The red light also flashes when you insert the battery into the charger. You can also expect red light when you insert an abnormal battery into the charger.

How do I charge a Ryobi 40V battery?

It may seem obvious, but it is essential to ensure your battery is correctly inserted into the charger. Most Ryobi 40v batteries have a gray button (or buttons) that should be pressed down when inserting the battery into the charger. Push the gray buttons and slide the battery onto the charger- you should hear an audible click.

Why is my Ryobi 40V battery not charging?

Electronics can sometimes act strangely, and Ryobi chargers are no exception. If your Ryobi 40V battery isn't charging, first try unplugging the charger, wait for about a minute, then plug it back in. If this does not solve the problem, move on to the next steps. There are two ways that you can check if your battery charger is faulty or not.

If the green light is off, but the red LED is flashing, the charger is testing the battery because it was either too hot or too cold when you inserted it. A flashing red light could evolve into flashing red and green LEDs, which is a sign of trouble.
