

Soc energy storage cabinet

What is socomec outdoor energy storage?

Socomec's outdoor energy storage solutions ensure the proper energy mix of buildings and the power grid's stabilization, making them ideal for commercial and industrial facilities.

Why should you choose energy storage cabinets?

This ensures that energy storage cabinets can provide a complete solution in emergency situations such as fires. To accommodate different climates, we provide professional recommendations based on customer usage scenarios and requirements.

Which energy storage systems are UL certified?

The complete system is certified to the latest UL 9540, the safety standard for energy storage systems in both the Canada and the USA. SUNSYS HES L is a modular energy storage system that uses 2 standard cabinets to enable 29 UL-certified configurations, providing ideal system sizing for a variety of projects.

Why should you choose CATL & socomec?

Thanks to a co-design between CATL and Socomec, you can be assured of compatibility between products, and that the complete system has been validated and certified. The C-Cab (power conversion cabinet) has been designed to include everything required for battery operation, including the management system as well as the power supply.

Do energy storage cabinets need to be painted?

This ensures that energy storage cabinets maintain excellent appearance and performance, as well as resisting corrosion and UV radiation. We place particular emphasis on comprehensive pre-paint processes, including degreasing, cleaning and neutralisation, to ensure excellent paint adhesion and quality.
