

# Sodium ion battery storage project financing options in Guernsey 2030

What is a Technology Strategy assessment on sodium batteries?

This technology strategy assessment on sodium batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

Are sodium batteries a good choice for energy storage?

Much of the attraction to sodium (Na) batteries as candidates for large-scale energy storage stems from the fact that as the sixth most abundant element in the Earth's crust and the fourth most abundant element in the ocean, it is an inexpensive and globally accessible commodity.

What is a sodium ion battery?

Sodium-ion batteries (NaIBs) were initially developed at roughly the same time as lithium-ion batteries (LIBs) in the 1980s; however, the limitations of charge/discharge rate, cyclability, energy density, and stable voltage profiles made them historically less competitive than their lithium-based counterparts .

Can sodium-based batteries be used for static storage?

Sodium-based batteries could be such an option, particularly for static storage, where cost is a more important factor than weight or performance.

Is sodium-ion a make-or-break year for the battery market disruptor?

Data adapted from Wood Mackenzie, "Sodium-ion update: A make-or-break year for the battery market disruptor," January 2023 .

Are battery series of the future regulated?

Series of the future. Safety and safety hazards are regulated in the Battery Directive 2006/66/EC in the upcoming Eco-design Directive for Batteries with an update concerning batteries and waste batteries in the amending regulations 2019/

Sodium ion battery capacity is surging as an additional 50 gigawatt-hours (GWh) are expected to come online this year along with 14 new market entrants, taking global capacity to 70 GWh, according to Benchmark's Sodium ion Battery ...

Sodium-ion Battery Market Summary The global sodium-ion battery market size was estimated at USD 321.75 million in 2023 and is projected to reach USD 74.74 billion by 2030, growing at a CAGR of 20.0% from 2024 to 2030. The global ...
