

Solar Panel cost vs benefit calculation in Greece

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is EUR3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about EUR8,600, or EUR6,450 after the federal solar tax credit of 25% is applied.

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

How many solar panels are installed in Greece?

By April 2015, the total installed photovoltaic capacity in Greece had reached 2,442.6 MW from which 350.5 MW were installed on rooftops and the rest were ground mounted. Greece ranks 5th worldwide with regard to per capita installed PV capacity.

When did solar power start in Greece?

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV.

Why is solar power so popular in Greece?

Solar power in Greece has been driven by a combination of government incentives and equipment cost reductions. The installation boom started in the late 2000s with feed-in tariffs has evolved into a market featuring auctions, power purchase agreements, and self-generation.

Solar Panel Cost Calculator: Find Your 7-10 Year Breakeven Point Calculate solar panel cost by multiplying the system size in kilowatts (kW) by the average cost per watt. In the U.S., residential solar panels cost about \$2.50 to \$3.50 ...
