

Solar Panel project financing options in Mexico 2025

Why are solar energy projects growing in Mexico?

This affordability is driving the expansion of solar energy projects across the nation, such as the new 500 MW solar panel production line recently commissioned by Solarever. Mexico's wind energy sector is also experiencing rapid growth.

How much does solar energy cost in Mexico?

The solar energy market in Mexico is burgeoning, with significant investments enhancing its infrastructure. According to Mordor Intelligence, the average levelized cost of electricity (LCOE) for utility-scale solar photovoltaic (PV) projects is approximately USD \$0.049 per kWh, making it a competitive alternative to traditional energy sources.

Why is solar power a good investment in Mexico?

Our positive outlook is driven by favorable government policies and better economics for project developers. In addition, the solar irradiance levels and the continued focus on corporate sustainability will also continue to support strong demand for solar power in Mexico. Contact us today.

Can solar panels be used at night in Mexico?

Having a battery bank in your home to store the energy your panels produce during the day is a thing of the past, now you can feed the utility grid in Mexico during the day while your solar panels are generating and utilize the grid's energy during the night at no cost to you.

How much does Mexico spend on electricity subsidies?

People pay around 70% of the true cost of electricity thanks to Mexico's current national energy policies. However, the cost of maintaining this subsidy has made public investment in renewable energy developments less attractive. Mexico spends roughly \$6 billion annually on electricity subsidies.

Why do we need energy bonds in Mexico?

These types of bonds can help to encourage the faster development of renewable energy projects, as seen in cities such as San Francisco in the United States. At present, Mexican energy is highly subsidized by the Government of Mexico (GoM). People pay around 70% of the true cost of electricity thanks to Mexico's current national energy policies.
