

Solar battery east sussex

Who are solar Sussex?

As a Sussex based solar panel provider and installer, Solar Sussex are passionate about solar panel installs and the use of renewable energy technology. Solar Sussex believe that there has never been a better time to invest in enhancing the power of the sun to generate your own electricity using solar panels.

Are you happy with Sussex solar?

We are extremely happy with our solution and we are experiencing the huge benefits already. Sussex Solar supplied an Air Source Heat Pump, PV Solar Panels, Battery and Grid Gateway to our home and did an excellent job right from the initial enquiry and informative survey, through installation and final commissioning.

Why should you choose Sussex solar?

Standout feature is the professional but positive likeable attitudes of all staff and business owners. I will not hesitate to select Sussex Solar in future, if or when I consider maybe solar, heat pump, or another battery. A pleasure when first time using a new supplier that they not only meet but exceed expectations.

Experienced - Dedicated - Professional What to expect having a battery storage systems installed: With offices in Eastbourne and Brighton, we provide battery storage installation for East Sussex, West Sussex and Surrey residents. Step - 1
