

Solar battery rebate western australia

What solar battery rebates are available in WA?

Join the Waitlist! Starting on (or before) July 1, 2025, WA residents can access up to \$17,500 in solar battery rebates and interest-free loans. All totalled, the state government is offering 20,000 non-means-tested rebates for residential solar batteries of up to \$5,000 for Synergy customers, and up to \$7,500 for Horizon Power customers.

Are solar battery rebates a good idea for Western Australia?

Solar battery rebates proposed for Western Australia are a positive initiative to strengthen the energy grid and ensure the network remains energised during periods of less stability. Image: West Australian government battery rebate advertisement, February 2025. 1. Federal

What is the WA Government's Battery rebate scheme?

With degrees in business technology, science, and marketing, James combines in-depth market insights with technical knowledge, positioning him as a trusted authority in renewable energy. The WA Government's battery rebate scheme launches by July 2025, offering up to \$7,500 in rebates and \$10,000 interest-free loans for eligible households.

What rebates are available for residential solar batteries?

All totalled, the state government is offering 20,000 non-means-tested rebates for residential solar batteries of up to \$5,000 for Synergy customers, and up to \$7,500 for Horizon Power customers. Register your interest now to be first in line for the state's most generous solar battery scheme.

Can you get a rebate if you install a solar battery?

In a push to boost renewable energy and ease pressure on the electricity grid, the WA Government has rolled out a rebate for eligible households that install a solar battery. Depending on your situation, you could pocket thousands in savings -- making it much easier to future-proof your home against rising energy bills and blackouts.

Which batteries are eligible for the WA battery rebate?

The WA Government hasn't given details on which batteries will be eligible. What we do know is batteries must have at least 5 kWh capacity and be Virtual Power Plant (VPP) ready - as recipients will need to join a VPP to receive the rebate. You can also get the rebate for a new battery if you already have one.
