What is the NSW solar battery rebate?

Save on solar battery costs and reduce your energy bills with the new NSW Solar Battery Rebate, launched on 1 November 2024. Under the Peak Demand Reduction Scheme (PDRS), the NSW Government is helping households and businesses with rooftop solar systems unlock the full potential of their solar energy.

How much does a solar system rebate cost?

Eligible homes and businesses can receive a rebate between \$1,600 and \$2,400 off the upfront installation cost of a new solar system battery, depending on the size of the battery. Additionally, an incentive of \$250 to \$400 is available for connecting the battery to a VPP.

What is the federal solar battery rebate?

The Federal Solar Battery Rebate is a \$2.3 billion subsidy scheme by the Australian Government, officially known as the Cheaper Home Battery Program. It is a nationwide solar battery incentive designed to accelerate battery adoption across Australia to reduce home battery installation costs by around 30%.

Is the new Australian battery rebate a good idea?

The NSW government is no longer providing an upfront saving off new batteries. In place of that incentive, is the more generous, nationwide home battery rebate. The new Australian battery rebate provides greater savings than the initial NSW subsidy, so residents are far better off after the change.

What is a solar rebate or subsidy?

A rebate or subsidy will cover part or all of the upfront cost of buying solar or a battery. Rebate schemes operated by states, territories and local governments sometimes only apply to particular groups of people or types of housing, such as social housing, rental properties or apartments. Eligibility criteria may relate to:

Can you get a rebate if you add a solar battery?

If you're considering adding a solar battery to your home--or already have one--you may be eligible for up to \$1,500 in upfront support by connecting your battery to a VPP. This rebate can be combined with other eligible programs, helping you cut costs and make your battery system pay for itself faster.
