

Solar battery virtual power plant

A Virtual Power Plant (VPP) is essentially a network of connected home solar and battery systems that work together as a collective energy resource. Rather than using your solar battery just to power your home, a VPP allows you to share ...

You can receive an incentive for connecting your solar battery to a Virtual Power Plant (VPP). In addition to this incentive, connecting to a Virtual Power Plant allows you to sell your excess electricity to the grid on an ongoing basis to ...
