

Solar diesel hybrid storage EPC turnkey quotation per 5MW 2030

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

How much does the EPC project cost?

The EPC contractor will also be responsible for the operation and maintenance (O&M) of the plant for ten years. The last date to submit the bids is September 14, 2022. Bids will be opened the following day. The overall project cost is estimated to be INR 635.73 million (~\$8.01 million).
