How much do solar panels cost?

Solar panels themselves represent only 12-18% of total system cost, typically \$0.30-\$0.50 per watt. Premium monocrystalline panels offer 20-22% efficiency but cost more than standard panels with 18-20% efficiency. Panel type significantly impacts both cost and performance:

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a kWh cost?

kWh is what you currently pay for your electricity. Your utility company or your solar company sends you a monthly bill that says how many kWh of energy you've used that month. The price per kWh on your electricity bills can range anywhere from \$0.0771 in Louisiana to \$0.3236 in Hawaii.

How much does a 5kw Solar System cost?

According to the National Renewable Energy Laboratory (NREL), a typical U.S. household installs a 5kW solar system. The solar panel cost is a portion of the total price you have to pay for installing solar panels. At the current average cost of \$2.71 per Watt, a typical 5kW system will cost you \$13,550.

We want to install a solar system that will take care of all the electricity needs of our house. That means that (in the US) such a solar system has to produce 10,715 kWh per year. We will first use the solar power calculator to figure out ...
