What is a solar O&M plan?

Solar O&M plans protect your solar panel system and address problems promptly so you don't lose out on energy generation. Different O&M options include plans with a dedicated provider, services directly from your solar panel system installer, and inverter monitoring.

What is O&M in solar?

O&M includes a variety of basic functions such as: rapid problem identification and resolution, minimizing downtime due to faults, and comprehensive reporting and transparency. What is solar operations and maintenance?

Who is a non-electric solar O&M Company?

We are a Non-Electrical Photovoltaic Solar O&M Company. This includes solar panel cleaning, vegetation management, thermal imaging, soiling mitigation and site maintenance. Discover the power of efficient solar energy with our nationwide services!

What is a dedicated solar O&M provider?

A dedicated O&M provider is a third-party company (not your solar installer or equipment manufacturer) that you hire to monitor and maintain your solar panel system. Under the umbrella of dedicated solar O&M providers, you can choose from several types of plans. Three of the most common plans are preventative, corrective, and real-time.

What are the different aspects of solar O&M?

There are several different aspects of solar O&M: Each of these approaches employs a number of services, which can include: performance monitoring and diagnostics, energy forecasting, warranty administration, and preventative maintenance like module cleaning and vegetation control.

Do I need a solar O&M plan?

If your solar installer closes up shop, you may opt to sign up with a dedicated solar O&M provider to handle your system's monitoring and maintenance from here on out. That said, getting a separate O&M plan may not be necessary if you're just looking for maintenance for one-off issues.
