

# Solar storage inverter project financing options in Argentina 2025

What are Rigi-approved solar projects in Argentina?

Notably, the first RIGI-approved project is YPF Luz's 305 MW solar photovoltaic park in Mendoza, with an investment of US\$211 million. Vaca Muerta, holding the world's second-largest gas reserves, represents a cornerstone of Argentina's energy strategy.

How is Argentina developing its energy sector?

Argentina's energy sector development continues to evolve, with current priorities focused on expanding natural gas infrastructure, developing LNG export facilities, modernizing the power grid, and integrating growing renewable energy capacity.

What will Argentina's energy mix look like in 2024?

By 2024, the share of renewables in Argentina's energy mix is expected to exceed 17%, representing significant progress, although still below the 20% target set for 2025.

Why should you invest in Argentina in 2025?

Whether you're interested in energy, real estate, or technology, Argentina's diverse economy and strategic reforms create an environment ripe for success in 2025 and beyond. Take advantage of this moment to explore partnerships, capitalize on government incentives, and become part of Argentina's growth story.

What challenges does the energy transition face in Argentina?

However, the energy transition in Argentina faces some important challenges. One of the most important is the need to modernize and expand electricity transmission infrastructure, especially in regions far from urban centers where many renewable energy projects are located.

Why is Argentina a good place to invest in copper?

With global copper demand surging due to green energy projects, Argentina's reserves in San Juan and Catamarca are primed for development. The government is simplifying regulations and offering tax incentives to attract mining investors while emphasizing sustainable practices.

Safe harboring looks different for residential solar contractors than for utility-scale contractors. Residential contractors can claim these bonus credits for third-party owned systems, and will typically stockpile inverters or ...

After debt payments have been made, other investors (like equity investors) will be paid. In general, project's assets are used as collateral to the loan. This type of financing is common in renewable energy projects because building solar, ...
