

Successful bid price of Solar Inverter project in Poland 2030

How many solar projects has RWE been awarded in Poland?

RWE has been awarded 31 solar projects in Poland, with a combined capacity of 102 megawatts of direct current (MWdc), following the latest renewable energy auction held by the Polish energy regulator, Urząd Regulacji Energetyki (URE). This capacity translates to approximately 84 megawatts of alternating current (MWac).

How good is the photovoltaics market in Poland 2023?

Achievement of Polish photovoltaics - key data The IEO report „Photovoltaics market in Poland 2023” shows that the year 2022 was very good for the photovoltaic sector in Poland, better even than the record year of 2021. In 2022, photovoltaics was yet again the leader and the main driving power for the increase in RES market in Poland.

How many solar projects are there in Poland?

Katja Wünschel, CEO of RWE Renewables Europe & Australia, commented, "Securing these 31 solar projects is a significant achievement and reinforces our commitment to expanding solar energy in Poland. We already have 91 MWac of solar capacity operational in the country, with over 100 MWac under construction."

Which country has the largest solar PV market in Poland?

By geographical distribution, the largest share of solar photovoltaic (PV) capacity in Poland is belonging to the Lublin province with more than 10 % of all installations in the country. Is it possible Polish solar PV market to start growing sizeable in the near future?

How much solar power will the EU have in 2025?

The new EU solar energy strategy assumes installation of over 320 GW in solar photovoltaic power already by 2025 (which is twice the value of 2020) and almost 600 GW by 2030. Already in 2025, the sector of cell and PV module production in the EU would near achievement of a production capacity equivalent to 20 GW annually (5 GW at present).

What is the RES target for the EU for 2030?

Consequently, the RES target for the EU for 2030 was raised from 27% (as agreed in 2014) to 45%. The new EU solar energy strategy assumes installation of over 320 GW in solar photovoltaic power already by 2025 (which is twice the value of 2020) and almost 600 GW by 2030.
