

# Successful bid price of Solar Panel project in Canada 2026

How much will a solar module cost in 2025?

Some global forecasts even suggested wholesale module prices could stay around that \$0.10/W mark into 2025, though retail prices for homeowners will always be higher due to markups and other costs. Demand is also growing fast, both globally and here in Canada.

Will authorised rooftop solar panels be capped in 2026?

A proposal is also under review to raise the cap on authorised rooftop solar installations. Starting in 2026, homes and businesses will be able to receive financial support to purchase and install their own solar panels.

Why are solar panels so expensive in Canada?

The main reason was a surge in manufacturing capacity, basically more panels being made than were immediately needed, leading to intense competition. Since Canada imports a lot of its panels, this global trend definitely put downward pressure on module costs here. But here's where it gets interesting for us in Canada.

Can solar panels reduce electricity bills?

Hydro-Quebec said customers who install solar panels will be able to sell surplus electricity at full value and reduce annual electricity bills by up to 30%, or around CAD 500 (USD 362/EUR 319). A proposal is also under review to raise the cap on authorised rooftop solar installations.

How much do solar panels cost per watt?

Average cost per watt (National) reflects the current market trends in solar pv technology. It's also worth remembering that costs aren't uniform across the country. Early 2024 saw Alberta reporting lower costs, around \$2.60 per watt, while places like Nunavut were significantly higher. Your local market for solar panels cost really matters.

Is solar cost a long-term trend?

The long-term trend for solar costs has consistently been downward. Think about it: module costs are down an incredible 99% since 1980! Continued innovation and economies of scale should keep pushing costs lower over the long haul.

How tariffs are influencing construction costs--and what you need to know. The start of 2025 has introduced increased pricing volatility and reduced predictability due to changing tariffs and international trade policies. These shifts are ...
