

Successful bid price of Solar Panel project in Greece 2026

How much does a solar project cost in Greece?

The joint tender awarded 14 solar farms, or 372 MW of capacity, and about 166 MW of wind. The average awarded price for PV projects came in at EUR47.98 (\$48.83)/MWh, while wind power projects were also awarded various tariffs, with an average price of EUR57.66/MWh. Greece's state-owned utility, Public Power Corp. (PPC), was awarded 251 MW of PV.

How much does PV cost in Greece?

The average awarded price for PV projects came in at EUR47.98 (\$48.83)/MWh, while wind power projects were also awarded various tariffs, with an average price of EUR57.66/MWh. Greece's state-owned utility, Public Power Corp. (PPC), was awarded 251 MW of PV. That capacity is spread across 80 MW, 75 MW, 16 MW and 80 MW installations.

When will RES projects be auctioned in Greece?

Regarding support schemes, some 4.1 GW of RES projects will be auctioned in Greece between 2023 and 2025, with PV expected to get around 3 GW. In 2022, the Greek Parliament also passed a thorough regulatory framework for storage.

How many MW of solar power does Greece have?

Greece's state-owned utility, Public Power Corp. (PPC), was awarded 251 MW of PV. That capacity is spread across 80 MW, 75 MW, 16 MW and 80 MW installations. Heliothema Energy, France's EDF renewables energy unit in Greece, won an additional 33 MW of capacity, also spread among four projects.

Why is solar power growing in Greece?

However, the utility-scale and residential self-consumption segments are experiencing noteworthy growth for the first time. The bright weather across the country helped solar PV to contribute to some 13.6% of total Greek electricity production in 2022, breaking yet another record.

How is storage regulated in Greece in 2022?

In 2022, the Greek Parliament also passed a thorough regulatory framework for storage. Large-scale storage are selected through a bidding process, with a total tendered power capacity of 1,000 MW and at least 2.6 GWh of storage capacity.

In Greece, this trend has become more pronounced in 2024, mainly due to rising energy prices and the desire to avoid consumption peaks. The most common solutions include systems that combine photovoltaic panels with lithium-ion ...

Greece added 1.59 GW of new solar PV capacity last year, and projections for this year look strong as well.

Successful bid price of Solar Panel project in Greece 2026

However, with a struggling grid and continued growth of intermittent power sources, curtailment remains the sector's thorniest ...
