

# Successful bid price of VRFB energy storage project in France 2025

Is flexibility a good investment in France for grid-scale battery projects?

Aurora Energy Research has published a flexibility market report showing a significant improvement in market conditions in France for grid-scale battery projects

When will AFRR capacity market reopen in France?

On June 19, 2024, France adopted a pay-as-you-go mechanism for its aFRR capacity market, which has significantly boosted short-term revenues. Aurora expects high prices in the aFRR market to persist until 2028, stabilizing in 2030.

What does VRFB stand for?

The development of global standards and specifications for the electrolyte used in vanadium redox flow batteries (VRFBs) is "crucial" for the technology's prospects.

Will AFRR prices continue to rise in 2028?

Aurora expects high prices in the aFRR market to persist until 2028, stabilizing in 2030. Along with an increase in the price differentials in the spot market, driven by higher gas prices, these factors have resulted in an increase of more than 2% in the IRR for battery projects with a commercial operation date in 2025.

Will AFRR capacity prices increase 2%?

The report predicts an increase of more than 2% in the internal rate of return (IRR) for investment scenarios, driven by high aFRR capacity prices in the short term and greater energy trading opportunities.

In January 2025, LE System expanded its global footprint by exporting large-scale vanadium flow battery materials to support energy storage projects worldwide. The company is enhancing its production capacity and establishing new facilities.
