

Successful bid price of container energy storage project in Oman 2026

Is Oman ready for a green hydrogen project?

Oman is moving forward with green hydrogen projects, with the first Final Investment Decision (FID) expected in 2026-27. Over the past two years, eight consortiums have been awarded land blocks in central and southern Oman to develop large-scale green hydrogen production.

How will OQ Oman's fuel storage project work?

The platform will be powered by solar and wind energy. The pipeline will consist of two 12-inch lines, each two kilometres long, and will be accompanied by a parallel fibre optic cable. OQ Oman announces that the foundation stone laid for its Strategic Fuel Storage Project in Musandam.

Does OQ offer training opportunities for 12 Omanis?

OQ has also offered training opportunities for 12 Omanis as part of its broader commitment to workforce development. The facility, covering approximately 100,000 square metres, will include storage tanks, a warehouse, a control room, a pump area, a truck loading zone, and fire safety systems.
