

Successful bid price of industrial energy storage project in Malaysia 2025

How many Bess projects are there in Malaysia?

The programme is broken into four projects with a capacity of 100mw/400mwh each and includes the design, installation and operation of BESS at various sites in Peninsular Malaysia. Each project must start operations by 2026 and is expected to have commercial operations spanning over a period of 15 years.

Why is Malaysia launching a Bess project?

The inaugural development of public BESS project in Malaysia is part of the Government's efforts to support the energy transition and achieve the goals of increasing the country's installed renewable energy capacity to 70% and to achieve net-zero by 2050.

Should foreign players participate in Bess projects in Malaysia?

Nevertheless, given that the development of BESS projects in Malaysia is still at an early stage, participation of foreign players with experiences in energy storage system projects may be crucial to support and encourage further projects of the same nature to be developed in the Malaysia energy market in the future.

When was Bess first energized in Malaysia?

The 60 MW/82 MWh BESS, which was first energized in Dec 2024, shares the site with the soon-to-be-phased-out Sejingkat Power Plant, first commissioned in 1998. The commissioning is a new development for utility-scale BESS in Malaysia.

EVE's Malaysia factory project consists of two phases. The first phase is the "International Cylindrical Battery Industry Park" project, with an investment of no more than 422.3 million US dollars, located in Julin County, ...
