

Successful bid price of mobile ESS unit project in Switzerland 2025

What happened to ESS bid prices in March 2024?

In March 2024, ESS bid prices varied depending on their storage capacity, with an overall downward trajectory evident, particularly in the case of four-hour ESS bids, which hit yet another all-time low. Raw material prices for storage battery are expected to remain stable. At the outset of 2024, battery prices experienced a decline.

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

Is Bess being monetised in the Swiss electricity market?

It is being monetised in the Swiss electricity market by both CKW, part of Axpo, and utility Alpiq, the announcement said. The BESS is part of a network of power plants, consumers and batteries, it added. The large-scale BESS market in Switzerland has been relatively quiet with renewable penetration on the country's grid still relatively low.

What is the price gap between ESS and batteries?

In March, the price disparity between ESS and batteries has continued to shrink. The average price of a 280Ah/0.5C storage battery hovered around 0.38 yuan/Wh in March 2024. According to our data, the average winning price for a 2-hour ESS is approximately 0.63 yuan/Wh, resulting in a price gap of around 0.25 yuan/Wh.

Does Switzerland have a Bess system?

The BESS is part of a network of power plants, consumers and batteries, it added. The large-scale BESS market in Switzerland has been relatively quiet with renewable penetration on the country's grid still relatively low. Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year.

What is EWS' Bess project?

EWS' BESS project has primarily been deployed to help transmission system operator (TSO) Swissgrid keep the grid stable, via the provision of frequency response services to maintain a 50hz frequency. It is being monetised in the Swiss electricity market by both CKW, part of Axpo, and utility Alpiq, the announcement said.

In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of INR3.32 per unit--5.8 per cent lower than the rate discovered in a similar tender by
