

## Successful bid price of on grid solar storage project in Spain 2030

Spanish solar auction prices have been quoted as a signal of how cheap solar energy has become. CRU's data suggest that those prices do not reflect current real costs but imply high future electricity prices driven by high carbon prices.

Storage that is currently available in Spain comes mainly from pumped hydro and concentrated solar power (CSP) plants, to which the government wants to add large-scale batteries, behind-the-metre batteries -- minimum 400 MW in 2030 - ...
