

Successful bid price of utility scale ESS project in Finland 2030

Which Bess projects are in the pipeline in Sweden?

Most BESS projects in the pipeline in Sweden are 1-hour systems, with the business case still very much centred around ancillary service markets. One of the first European-owned gigafactories for battery cell production, Northvolt's Ett was built in Sweden, and the company is collaborating with Volvo to build the country's second site.

How does Vres affect Finnish electricity supply?

The decrease in dispatchable power generation from thermal power plants using stored fuels and the increase in the amount of electricity generated by VRES leads to a decline in the flexibility of the Finnish electricity supply. As a result, it becomes more challenging to ensure that supply and demand always match.

How does the Finnish TSO respond to the growing number of renewable installations?

The Finnish TSO, Fingrid, is continuously taking measures to respond to the fast-growing number of renewable installations. The power system is getting more complicated both from a technical and commercial perspective, with many large changes occurring simultaneously both in electricity production and consumption.
