

# Sunrun solar battery cost

How much does Sunrun cost?

Sunrun is great for homeowners who want to go solar but can't afford the upfront cost, which even with federal tax credits, averages about \$22,000 nationwide. That's according to the latest data from EnergySage, a solar marketplace (and a GH Home Reno Award winner) that helps consumers shop for home energy solutions.

Does Sunrun offer battery storage?

Connect with a Sunrun consultant and determine which battery storage and backup solution will best meet your energy needs. Sunrun offers Tesla Powerwall, a battery that uses stored solar power and backs up your home during a power emergency. Enjoy flexible financing, and get yours today.

How much does a Sunrun battery cost?

On the higher end, one Sunrun customer, Faliasha in Colorado, got a \$43,000 loan to pay for their installation. Keep in mind that solar batteries are expensive. Expect to pay anywhere from \$7,000 to \$18,000 or more to add battery backup storage to your Sunrun installation. Anecdotally, Hassan in California was quoted \$10,000 for their batteries.

Does Sunrun sell solar?

(We should note that Sunrun also sells solar systems to homeowners, including through a partnership with Costco that gives members a 10% discount on the equipment costs, but it's a much smaller part of their business.)

Does Sunrun install solar panels?

In addition to the solar panels mentioned above, Sunrun installs two battery options -- LG Chem and Tesla Powerwalls -- in its trademarked "BrightBox" storage systems. It also installs EV chargers and has a partnership with Ford to provide backup power for your home with the Ford F-150 EV, and it offers free system monitoring software.

How much does a Sunrun solar conversion cost?

Sunrun may have somewhat attractive pricing given the quality of the panel brands it installs, but your total is still likely to come out to more than \$25,000. Luckily, there are a few things you can do to save some money on your solar conversion with Sunrun. We'll explain these below.

The last rebate is a possibility with the local electric company if I agree to allow them to pull 5Kw over a 2 hr period nightly. That rebate is \$4250 per 5Kw plus an automatic \$25 bill credit monthly and the cost of production (e.g. \$0.37/kWh) ...

Solar companies are picking up on the trend - many have started offering battery installation as a service to pair with a solar panel system. The largest residential solar installer in the country, Sunrun, has a "solar
