

The latest winning bid for pumped storage power stations in developed countries

How many pumped storage stations will China build in 2022?

The first two units were connected to the grid in October 2022. The 1.2 GW project, being developed by Anhui Jinzhai Pumped Storage Power Co., LTD, one of the divisions of State Grid XinYuan, will play a role in helping China achieve its goal of building more than 200 pumped storage stations with a combined capacity of 270GW by 2025.

How to promote the construction of pumped storage power stations?

To promote the construction of pumped storage power stations, it is of great significance for the construction and optimization of modern power systems. 2. Development trends of pumped storage energy in China To effectively support the construction and development of pumped storage power stations, China has issued a series of supporting policies.

What pumped storage power stations ushered in a new peak?

During the "Twelfth Five-Year Plan" and "Thirteenth Five-Year Plan" periods, to adapt to the rapid development of new energy and UHV power grids, pumped storage power stations such as Fengning in Hebei Province and Jixi in Anhui Province ushered in a new peak.

Which provinces have pumped storage power stations?

Analyzing the approved quantity and installed capacity of pumped storage power stations in Henan, Hubei and Hunan provinces. Analyzing the construction subject, design unit and typical technical and economic index of pumped storage projects.

How pumped storage and new energy storage are developing in central China?

The development of pumped storage and new energy storage in Central China shows a trend of coexistence and complementarity, which is mainly due to the great importance of energy structure optimization and power system regulation capacity in the region.

Which province has the most positive momentum in pumped storage development?

After the "14th Five-Year Plan", Hubei Province has the most positive momentum in the development of pumped storage, only in 2022 a year to approve 9 power stations, with a total installed capacity of 9.696 gigawatts, the number and scale are first in the country.
