

Total investment cost of lead acid battery storage project in Norway

How much does a battery project cost?

Developer premiums and development expenses - depending on the project's attractiveness, these can range from €50k/MW to €100k/MW. Financing and transaction costs - at current interest rates, these can be around 20% of total project costs. 68% of battery project costs range between €400k/MW and €700k/MW.

Are EV batteries the future of energy storage?

"There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Rune, Head of Battery Norway. An early adopter of electric transport, Norway continues to capture EV battery headlines.

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

The battery storage technologies do not calculate LCOE or LCOS, so do not use financial assumptions. Therefore all parameters are the same for the R& D and Markets & Policies Financials cases. The 2023 ATB represents cost and ...
