

Total investment cost of office building energy storage project in Mexico

How can Mexico accelerate investment in energy storage?

Mexico must set a legal definition of energy storage and clear market regulations. As a late mover, Mexico can select projects with less technological uncertainty. Procurement targets accelerate the formation of a storage market in the short term. Financial incentives are necessary to accelerate investment in energy storage.

How can industry integrate energy storage into the Mexican energy mix?

To integrate energy storage effectively into the Mexican energy mix, industry must lead the way in promoting links between academia, itself, government, and wider society to promote viable, scalable solutions.

Should energy storage be regulated in Mexico?

5.2.1. Mexico Energy storage appears scarcely in Mexican legislation and the few regulations that mention it leave the door open to potentially consider EST as either generation assets or transmission and distribution assets. If EST were regulated as generation assets, they could operate under a regime of free competition.

Should energy storage be considered a transmission and distribution asset in Mexico?

In Mexico, defining energy storage as a generation or a transmission and distribution asset is not only critical to establish revenue streams, but also to determine whether EST will be able to operate under a regime of free competition.

Is energy storage a global problem?

Despite their advantages, most EST have not been widely diffused in the global market. Although some EST still face high costs and technological uncertainty, it is widely accepted that the main barriers to the deployment of energy storage worldwide are inadequate regulatory frameworks and lack of policy support [, ,].

Why should Mexican companies invest in green hydrogen?

A versatile energy carrier that is increasingly seen as a requirement for decarbonizing hard-to-abate sectors. Supply disruptions already affecting Mexican businesses. Mexico has some of the best potential green hydrogen resources in Latin America. Develop a national hydrogen road map to provide direction for industry and investors.

April 2020 Hydrocarbon storage has been on energy executives' minds for a long time. Issues with capacity, safety, pricing and security are not new, but the dramatic drop in demand has brought them on the forefront. Storage in Mexico ...
