

Total investment cost of on grid solar storage project in Finland

Does Finland pay for solar power?

Finland is one of the few countries where solar power, in many cases, does not receive any subsidies, although companies and communities may apply for energy aid for smaller-scale (<5 MW) solar PV projects, which covers 15 % of the investment costs .

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

Which energy storage technologies are being commissioned in Finland?

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy Storages (CTES) connected to DH systems.

Is solar PV a viable alternative to wind power in Finland?

However, solar PV is currently in Finland the second least cost option for new electric power generation after wind power. The Energy Authority () collects the official data of grid-connected PV electricity in Finland from the grid companies on yearly basis. The results of the survey are published on late June.

Is the energy system still working in Finland?

However, the energy system is still producing electricity to the national grid and DH to the Lempäälä area, while the BESSs participate in Fingrid's market for balancing the grid . Like the energy storage market, legislation related to energy storage is still developing in Finland.

What is the growth rate of PV installations in Finland?

Nevertheless, there has still been significant growth in Finland for both industrial and household PV installations. In 2022, the installed capacity of mostly small-scale grid-connected PV installations increased to 395 MW from 288 MW in the previous year, yielding an annual growth rate of 37 %.
