

# Total investment cost of school solar storage project in Switzerland

How much solar power can a Swiss house generate?

According to a recent study by the Swiss Federal Office of Energy (SFOE) based on data from a solar potential cadastre (sonnendach.ch) and metadata, Swiss houses and factories could generate up to 67 TWh of photovoltaic power per year (current power consumption is around 60 TWh).

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

What is the PV potential of a Swiss roof?

The Swiss Federal Office of Energy has announced in September 2018 that the PV potential on Swiss roof was about 50 TWh. It represents about 90% of the annual consumption of Switzerland. The evaluation is based on the national maps for PV roof ( ) and on a selection of the most suitable roofs.

Is there a tendering scheme for PV systems in Switzerland?

There are no tendering schemes for PV systems in Switzerland. There are however several auction platforms for selling/buying green certificates (guarantee of origin). The price for those certificates has constantly dropped over the past years. No specific utility-scale measures are in place in Switzerland.
