

What are HYDAC hydraulic accumulators?

ROBUST AND VERSATILE: Wherever hydraulic tasks need to be performed, HYDAC hydraulic accumulators can help. They are versatile, make your machine more convenient to use, secure your hydraulic system and are used to increase the energy efficiency of hydraulic systems and for many other tasks.

When did hydropneumatic accumulators start?

The first production of hydropneumatic accumulators started in January 1980; accumulators diaphragm type, screwable and welded type. After that, we completed the range with bladder versions as well as supporting the first series of electromechanical pressure switches that are normally installed with the use of an accumulator.

Can HYDAC piston accumulators be customised?

HYDAC piston accumulators can be customised with a chosen diameter and nominal volume. More details can be found [here](#). CAD data can't be found at the product category level. Instead, it can be found directly at an individual product level.
