

# Türkiye energy storage fire fighting plant operation information

When does Türkiye's nuclear power plant start operating?

Türkiye's nuclear power plant, Akkuyu, started operating in April 2023 from its first, 1.2 GW reactor. Three additional reactors are planned at the Akkuyu nuclear power plant that will be online by the end of 2026 and will reach approximately 4.8 GW of capacity.

How much power will Türkiye have in 2035?

According to Türkiye's 2020-2035 National Energy Plan, Türkiye's power generation capacity will reach 189.7 GW in 2035 (a 79% increase from 2023). Türkiye's share of renewable energy will increase to 64.7% with solar power capacity increasing 432% and wind capacity increasing 158%.

What is firefighting and detection in power plants?

Firefighting and detection are one of the most critical systems in power plants. Although they are not so impressively in power plants too. They should not only detect the fire but also extinguish it, further more and limit the fire. In fire triangle which consists of air, flammable material and spark if we can delete each

How many refineries does Türkiye have?

As of January 1, 2023, Türkiye had six refineries with a combined processing capacity of over 826,000 b/d. Türkiye Petrol Rafinerileri AS (TPAS) operates four of the six refineries and accounts for 71% of the total refining capacity, and Ersan Petrol Sanayi AS and STAR Rafineri AS collectively hold 243,000 b/d of refining capacity.

How to protect battery energy storage stations from fire?

High-quality fire extinguishing agents and effective fire extinguishing strategies are the main means and necessary measures to suppress disasters in the design of battery energy storage stations. Traditional fire extinguishing methods include isolation, asphyxiation, cooling, and chemical suppression.

What is a special fire fighting capability (fire fighting capability)?

Such vessels complying with item B.3 may be given the notation (Fire Fighting Capability). The standard applied with data on the extent of this special fire fighting capability will be entered into class additional information of the class certificate, and such special fire fighting systems will be subject to annual surveys.
