What is the built capacity of energy storage in the UK?

The graphic above shows the built capacity of energy storage in the UK by project size by year where 2022 deployment levels exceeded the 2021 annual installed capacity of 617MWh. The first major utility-scale battery storage project was energised in 2017 - a 50MW/25MWh project in Pelham, developed and owned by Statera Energy.

How many energy storage sites are there in the UK?

There is now 2.4GW/2.6GWh across 161 sites of operational energy storage in the UK. 20.2GW have been approved in planning, including 33 sites of 100MW or more, meaning these projects are unlikely to be affected by any future (possible) planning changes. These projects are expected to be completed within the next 3-4 years.

How has the UK energy storage pipeline changed in 2022?

Indeed, the UK's energy storage pipeline increased substantially by 34.5GW in 2022. By the end of the year, 2.4GW/2.6GWh of battery storage sites have now been connected in total. This article discusses the significant growth of the energy storage pipeline in the past year and what to expect in the coming years.

How big is the UK energy storage pipeline?

The total pipeline for UK energy storage is now at 61.5GW across 1,319 sites. Image: Solar Media Market Research The graphic above shows the submitted capacity of energy storage projects by project size and by quarter; the total pipeline has now reached 61.5GW across 1,310 sites.

Which energy storage projects are using lithium-ion Bess technology?

Just over 70% of the successful projects in the first window of the UK's long-duration energy storage (LDES) scheme are using lithium-ion BESS technology. RWE Renewables Australia has successfully registered Australia's first 8-hour duration battery energy storage system (BESS) with the Australian Energy Market Operator (AEMO).

How much battery storage capacity is there in the UK?

Fig 1: There is over 440 GWh of battery storage capacity in the UK pipeline including 274 GWh (61%) at the pre-planning stage. Most of the projects are in the early stages: either announced by developers, included in the TEC register, or have screening/scoping applications submitted.
