

# Vat on solar batteries

Do I have to pay 0% VAT on solar & energy storage?

Solar Energy UK recommendations to support the uptake of residential solar and energy storage All solar and energy storage installations,including maintenance to existing sites,should be subject to 0% VAT. This should include residential energy storage when installed as a standalone measure.

What is the new VAT rate for solar?

Summary of changes: VAT on a range of domestic energy efficiency and renewable energy installations,including solar,is now 0%in Great Britain. This is a reduction from the previous rate of between 5% and 20% Eligible installations are those included on the Government's list of Energy Saving Measures (ESMs).

Does VAT affect solar battery storage?

It is a necessity,not a luxury,and it is pleasing to see this reflected in the VAT status of solar batteries. Effectively,the reductionin VAT will decrease homeowners' costs for energy installations,making them more affordable and financially efficient for the average household. When Will The VAT Exemption on Battery Storage Start?

Is there a VAT rate on storage batteries?

There is a 0%VAT rate on all storage batteries. Batteries have been available at this 0% rate since April 2022 if they are installed at the same time as electricity-generating systems like solar panels. And since February 2024,standalone or retrofitted batteries have also been rated at 0%.

Is 0% VAT on solar panels a good idea?

With there being 0% VAT on solar panels and battery storage there is no time like the present to invest in solar energy, and or expand your existing system.

How does VAT affect residential solar energy?

VAT is passed from the supplier onto the consumer and applies to all non-essential goods sold within the UK. This change in VAT illustrates the change in views around residential solar energy. Greener energy is essential to safeguard the future of our planet and reduce our reliance on fossil fuels.
