

WeCo solar battery

What is a WECO battery?

The WeCo battery allows Wifi connection compatible with 5G, which allows a quick and easy configuration and start-up. WeCo batteries have their own mobile App WeCo Batteries with which we can monitor the status of our storage system at all times. To control our WeCo battery via mobile phone we need to add a WeCo Wifi accessory.

What is a WECO modular lithium battery?

The WeCo modular lithium battery is one of the most advanced on the market for storage in photovoltaic solar energy systems. The WeCo battery is expandable and allows to connect from 1 module of 5.3kWh to 5 modules in parallel or even to add 5 clusters of 5 modules each thanks to the WeCo HUB to reach up to 132.5kWh.

How many batteries can a WECO battery module support?

In low voltage systems we can add 5.3kWh WeCo battery modules and expand up to a 5-battery cluster of 26.5kWh in parallel. The compact and handy design of the battery allows it to be fixed to the wall when using a single module or to stack the batteries securely when using more than one module.

What are Solis hybrid inverters & WECO batteries?

The combination of Solis Hybrid Inverters and WeCo batteries provides a robust energy storage system that can dramatically improve your savings with a photovoltaic system of 2kw and above.

How much power does a WECO lithium battery provide?

The WeCo lithium battery allows 5.3 kWh of useful power since its permitted discharge is 100% and would be equivalent to a 6.7 kWh battery with a permitted discharge of 80%.

Which inverter is compatible with the WECO XP WiFi battery?

The WeCo XP WiFi battery is compatible with the most commonly used inverter brands; Goodwe, The Voltronic Axpert, You know, Studer, Sma, Blue... Capacity of the module: 5.3 kWh Size: 460x520x155 weight: 53 kg Modular system Max. 15 units in parallel and 105 units with the WeCo Expansion Hub. Low voltage /high voltage applications
