

Are energy storage subsidy policies uncertain?

Subsidy policies for energy storage technologies are adjusted according to changes in market competition, technological progress, and other factors; thus, energy storage subsidy policies are uncertain. In this section, the investment decision of energy storage technology with different investment strategies under an uncertain policy is studied.

Can a firm invest in two energy storage technologies sequentially?

Under the continuous investment strategy, the firm can invest in two energy storage technologies sequentially, and each state is subject to policy uncertainty. Fig. 4 indicates the different states of the continuous investment strategy and the corresponding value functions under policy uncertainty.

How does policy uncertainty affect energy storage technology investment in China?

Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China. Subsidies of at least 0.169 yuan/kWh to trigger energy storage technology investment.

Should energy storage investors and policymakers consider incentive policies?

Furthermore, the findings of this study are particularly helpful for energy storage investors and policymakers, not only in China but also in other countries. For example, before designing incentive policies for the energy storage industry, policymakers should consider the intended effect of policy interventions on their targets.

What is a continuous investment strategy for energy storage technologies?

For current energy storage technologies, the continuous strategy can significantly shorten the investment timing and enable investors to adopt the storage technology as early as possible; therefore, when new technologies are unavailable, the continuous investment strategy is the best choice.

How can energy storage technologies address China's flexibility challenge in the power grid?

The large-scale development of energy storage technologies will address China's flexibility challenge in the power grid, enabling the high penetration of renewable sources. This article intends to fill the existing research gap in energy storage technologies through the lens of policy and finance.
