

# What are the compressed air energy storage projects along the Dniester river

What is compressed air energy storage (CAES)?

Among the different ES technologies, compressed air energy storage (CAES) can store tens to hundreds of MW of power capacity for long-term applications and utility-scale. The increasing need for large-scale ES has led to the rising interest and development of CAES projects.

Where is the Dniester pumped storage hydroelectric power project located?

The 2,268MW Dniester pumped storage hydroelectric power project is being developed by Ukrhydroenergo. Image courtesy of Ukrhydroenergo. The Dniester pumped-storage power project is located in the Chornivtsi Province of Ukraine. Image courtesy of Ukrhidroenergobud.

What is the Dniester power project?

The Dniester power project is a 2.2GW pumped-storage power plant (PSPP) under construction in the Chornivtsi province of Ukraine.

What is the Dniester pumped storage power station?

The Dniester Pumped Storage Power Station is a pumped storage hydroelectric scheme that uses the Dniester River 8 kilometres (5.0 mi) northeast of Sokyriany in Chernivtsi Oblast, Ukraine.

What is compressed air energy storage in aquifers (CAESA)?

As a promising technology, compressed air energy storage in aquifers (CAESA) has received increasing attention as a potential method to deal with the intermittent nature of solar or wind energy sources.

Can compressed air energy storage improve the profitability of existing power plants?

Linden Svd, Patel M. New compressed air energy storage concept improves the profitability of existing simple cycle, combined cycle, wind energy, and landfill gas power plants. In: Proceedings of ASME Turbo Expo 2004: Power for Land, Sea, and Air; 2004 Jun 14-17; Vienna, Austria. ASME; 2004. p. 103-10. F. He, Y. Xu, X. Zhang, C. Liu, H. Chen
