What are some useful reports about energy storage testing?

Below is a non-exhaustive list of valuable reports that the working group has relied on when becoming familiar with storage testing. "Electric energy storage - future storage demand" by International Energy Agency (IEA) Annex ECES 26, 2015, C. Doetsch, B. Droste-Franke, G. Mulder, Y. Scholz, M. Perrin.

Where can I find performance and testing protocols for stationary energy storage systems?

The United States has several sources for performance and testing protocols on stationary energy storage systems. This research focuses on the protocols established by National Labs (Sandia National Laboratories and PNNL being two key labs in this area) and the Institute of Electrical and Electronics Engineers (IEEE).

Can FEMP assess battery energy storage system performance?

This report describes development of an effort to assess Battery Energy Storage System (BESS) performance that the U.S. Department of Energy (DOE) Federal Energy Management Program (FEMP) and others can employ to evaluate performance of deployed BESS or solar photovoltaic (PV) +BESS systems.

What are the applications of energy storage systems?

Peak Shaving: Another important application is peak shaving, where the energy storage system is discharged during an "on-peak" period and charged during an "off-peak" period. Voltage Support: This is also important and is where the power is used to maintain the voltage within specified limits.

What is the electrical energy storage guide?

The Guide is designed as a reference document, with chapters relating to each stage of the project life cycle (e.g., procurement, installation, safety assessment, business case development). It also introduces various electrical energy storage technologies and the ways in which they can be used.

What is the energy storage operators' Forum guide?

This report is based on individual project outputs exchanged within the Energy Storage Operators' Forum in the United Kingdom. The Guide is designed as a reference document, with chapters relating to each stage of the project life cycle (e.g., procurement, installation, safety assessment, business case development).
