What type of battery does zareba use?

Battery type: 6 volt gel cell,10 amp hour lead-acid battery. Zareba® joins Fi-Shock® and Electrobraid® to form the largest manufacturer of electric fence systems in North America. Our company offers durable, reliable electric fence products for all your pet and livestock fencing needs.

How long does a zareba 5 mile solar low impedance fence charger last?

With the Zareba 5 Mile Solar Low Impedance Fence Charger your fence can have power from anywhere. This fence charger runs up to 2 weeks without sunlight and is powered by an internal rechargeable battery. With 0.15 output joules, this energizer will support animals and livestock such as cattle, horses, pigs, and goats.

Can a zareba 5 mile solar fence charger control livestock?

Controlling livestock in a location without access to AC power is easy with the Zareba 5 Mile Solar Fence Charger. The Zareba 5 Mile Solar Fence Charger powers up to 5 miles of fence and can be used with the following fence types: steel/aluminum, poly wire/poly rope and poly tape.

Is zareba a good electric fence charger?

The Parmak was the innovator of solar-powered electric fence chargers, but Zareba has made a name for itself in the industry as well. The Parmak is focused on meeting the needs of large livestock and produces a moderate amount of joule output along with a fair coverage distance, but it comes at an expensive price point.

How do I install a zareba® electric fence charger?

Knobs are designed to be under the charger to reduce exposure to the elements. The durable cabinet protects the circuitry from weather extremes. To properly install your Zareba® electric fence charger, charge it first by exposing it to the sun for 72 hours. After that, mount it and attach connections as directed.
